In 1983, AutoCAD was bundled with the Macintosh, followed by the IBM PC, and ported to other platforms in the following years. By December 1984, AutoCAD 1.0 was released for Macintosh. It was introduced at the 1984 Winter Consumer Electronics Show. The original AutoCAD was an inexpensive personal workstation, capable of drafting up to 64,000 points a minute. However, while the first version of AutoCAD supported a graphic tablet, it did not support a mouse or trackball as input devices. (A user interface tool, called the AutoCAD Assistant, was later released that used mouse and keyboard input devices for drawing.) AutoCAD 1.0 is a desktop application, requiring a single display, and it supported only a single type of computer language, code listing, or programming language. This means that it was not written with any type of code or programming language that could easily be modified or improved. The initial version of AutoCAD was a single-user application, with a menu-based user interface, called the AutoCAD Assistant. To work with the software, users had to familiarize themselves with the interface. In 1985, AutoCAD 2.0 for Macintosh was released, with a new user interface. It supported first-person view and was used to create two- and three-dimensional drawings. In October 1986, AutoCAD Release 1.0 (A1.0) was released for the DOS platform, followed by Release 2.0 (A2.0) in 1987. A major release, A2.1, followed in 1988. AutoCAD 2.0 for Windows was released in February 1987, followed by Release 3.0 (A3.0) in August of that year. A3.2 was released in August 1989. In 1990, AutoCAD 3.0 was released for Windows. The next major release, AutoCAD 4.0 (A4.0) was released in July 1991. For the DOS platform, AutoCAD Release 1.0 was released in September 1986, followed by Release 2.0 in October 1987. AutoCAD Release 2.0 for the Macintosh platform was released in February 1987, and Release 3.0 in November 1989. AutoCAD 3.1 for Macintosh was released in December 1990. AutoCAD 4.0 for the Macintosh platform was released in August
