The div and ul are all set to width:100%; but I can't figure out how to get the list to display all the way to the right of the div with the maximum width. Here's my JSFiddle: A: The issue is that your ul and div are both set to width:100%. Because they're set to width:100%, their widths are then set to 100% of 100% of the parent, i.e. 50%. Any width that's not 100% will not display correctly. To fix, use the width-property instead. using System.Reflection; using System.Runtime.CompilerServices; using System.Runtime.InteropServices; // General Information about an assembly is controlled through the following // set of attributes. What's new in Aim Lab Signature Series - Mongraal:

The Dark Eye: Chains of Satinav is a board game adventure published by Mayfair Games. Introduced in July 1993, it was based on a novel by Jim Cable in the fantasy The Dark Eye series of novels. The game was ported to the ZX Spectrum later that year. As with most of the board game adaptations, such as Mike Flamingo's Basingstoke or Black Falcon, it is a humorous take on the themes of the novels. Summary The Dark Eye series is well-known for its mixture of sword and sorcery, epic battles, horrible odds, Ruritanian-inspired magic, and often confusing storylines which take place in pseudo-medieval Europe. The game takes place against this backdrop. The player characters are three kids from the ruler Dämon's village, who discover a quest where one of them will sacrifice his life, in order to remove a curse from the Dark One's throne. Armed with swords, potions, spells and other items which are both useful and essential in battle, the adventurer has to journey across a fictitious and vaguely historically-accurate Europe through seven campaigns, and face endless enemies, dangers, and perhaps even Gods. However, the characters are not merely brought together by the curse that binds them, since they are aware of it, and are almost certain to die for the cause they dedicate themselves to and want to keep the kingdom safe. The curse is even mentioned as the main reason of the dark warriors' activity in the campaign booklet. The game material consists of a 96-page book, plus 51 double-sided map tiles (24 battle map tiles, and 27 flat dungeon tile). The text is fully translated into English and also includes many fictional names for items and magical spells. The game features perdieusis (battle), persuasion, adventuring, exploration and other games. Covering such themes as empire building and technology, it also touches on swords and sorcery and historical fiction. The premise of the game is similar to other board games set in the Dark Eye universe, such as Gottwald's Dagger – Die Nacht der Seherin, or Haining's Sword of the King. However, the tone is just as light and comedic as in most Mayfair games. The spells are also far more nonsensical, as they are not listed in any known language. The characters of the book are Anneli, the huntress from the first book, Kristin, the sorcerer from the second book,

They tried to put her on a pedestal with Mary, and all her hard work had been squandered when she tried to maintain a friendship with Mary, and has now been bled dry and she's dead. - There have been extensive film talks about the prequel Mary Jane the television show, one of the characters, who's like a total cliche, can you talk about some of the things that were changed in her story and in the film version? - The beginning of her story,
