The synthesis of previously unknown 3-amino-1,2,4-triazinanes 2 is described. Upon oral administration of 2 in rats, the novel compounds were dose-dependently absorbed over a broad range of doses and exhibit a cataractogenesis of the lens similar to the prototypical cataractogenic agent tert-butylhydroperoxide (TBHP). The highest dose exhibited a considerably greater reaction than TBHP. This result suggests that one or more species of the 2-nitro-3-hydroperoxy-1,2,4-triazinane (the hypothesized reactive intermediate in the cataractogenesis of terpin hydroxide) has been converted to other products during biochemical cataractogenesis and that the addition of a free amino group to this species has greatly increased its overall cataractogenic activity. The pharmacokinetics and metabolism of 2 in rats and rabbits are also reported.Description

Road Z Survival: The Last Winter is an open world game in a radioactive fall out of dark cold apocalypse. The world is infected by zombies. You are the last one out to survive! Build your own shelter, hunt, develop craft, and explore a frozen dead landscape. CRITICAL REVIEWS: "Personally I am really enjoying this game. The smooth gameplay and the nice graphics are making the experience really good. The map gives you a sense of freedom and makes playing the game fun. The game looks to be a lot of fun and now, you don't have to be worried when you are thinking about using this game on the mobile platform as it looks like a lot of fun to play on the Go." - Bluidoze "The game looks like the type of game you would expect to come to the mobile OS as the development team really seems to have put a lot of thought into the game. The fact that there are leaderboards and quests to complete gives players something to do and the fact that the developers have added plenty of game modes to make the game more than just another survival game is one of the things that makes this a game I'd expect to be one that I'd like to play." - Coolest Toys "Survival of the Dead is a game you can't miss with its features and how it works. It's a very fun and entertaining game if you have an Android mobile device with the Play Store on it. I personally recommend it to anyone and everyone who has a mobile device with the Play Store installed on it." - iPhone and Android Apps Support TUNES: Survive - Silent Walkers by amazon Carpe Diem - Down from The Blue Skies by jamie ovitz SFX: Musical Score: Aurello by AONIZ Here are a few screenshots for Road Z Survival: The Last Winter: Feel the music in this short trailer! What's new in Deponia:

has not released yet, but I have been playing most of the games recently. There was one game that stood out in my favorite games and that is called "You Are Here". It is just a game where you turn around 12 times and find 12 objects, then start using your controller to press a button to collect the objects until you reach a finishing round. It gets boring after a while because there is just so little interaction, but it is a lot of fun to play for a short period of time. You can watch the review video on YouTube: Games Played: 100% Total Games Reviewed: 8 Find the Last Piece of the Game: 100% What I Played: 4 Months 5 Hours and 1 Minute Below is a little screenshot of how the game plays. It is an article on my blog if you want to read more: You are here was an arcade game by Archie Bros Entertainment Ltd and published in 2013. You Are Here is a real time puzzle game where you navigate through a 3D environment and find 12 objects arranged in a maze. To begin, you move the B button to change your orientation, then you click the directional pad to move in that direction. You can save the game at any point by simply pressing the PS button. You can play You Are Here on Steam on HTC Vive. Pros: - This game is perfect for quick long sessions of play. You can enjoy it and spend many hours looking for the last piece of the game. The puzzles will never get repetitive as you can move through the world at your own pace. - Gameplay is not only easy but also fun. It has a nice blend of challenge and fun. It is rewarding when you get it wrong or when you are just slow at finding one of the objects. - There are not any missions or timers to complete and the puzzles are overall quite simple.

You are never wasting hours. - The B button acts as a 360 re-align, make it yours. You can move around as you please. - There are no fail states, unlike most video games. If you push a combination of buttons in the wrong order or simply had a bad time, you can simply reload the game and
