SENTRAN KAGURA Reflexions is a new story that takes place after SENTRAN KAGURA Burst Re:CREATORS. But first of all, here is an art for one of the bosses in the story. The art is done by our editor, Umi. Some of the weapons in the story can be obtained by defeating bosses. Using a boss's weapon can gain you some experience as well, which can be used in the game. Characters using the weapon have a special chat bubble for them, which you can see in the game. About SENTRAN KAGURA Reflexions: SENTRAN KAGURA Reflexions is a fighting game where you can make your own Senran Kagura characters and fight them against your friends and enemies. SENTRAN KAGURA Reflexions is in development by the Kyotop Club Studio. As a special launch, this game will be free for a limited time. \* Characters, designs, and names used are for the purpose of parody and no infringement of rights is intended. Why do I have to pay for an old game of this franchise? All the new ones had some bugs & I honestly am glad that game was released. I wouldn't buy a game for the franchise if there was no guarantee it would be released. But I would buy it if it was a new game Absolutely not. We are getting the old games in 3DS and PS4 and there is always a guarantee it will come out. Would be good if you got the option. We are all hyped for the new PS4 remake and the next PS3 has the new Senran Kagura Re:CREATORS game with the characters and the visual style. As for the PS4 game being delayed... I doubt it. I'm all for characters like Genji, not having him in the final game. Unfortunately they didn't have him either in the PS3 game. I'm more hype about the characters on this game being cut. But the visual style looks sweet. Chuyayui wrote:As for the PS4 game being delayed... I doubt it. I'm all for characters like Genji, not having him in the final game. What I really want to see
