Context and Background of the design. The companyÂ SMEÂ is a reputable Information Technology Services Provider to some of the leading service firms, likeÂ AUTO COMPANIES, with presence in 250 towns and cities across the nation. Its main office is situated in BRO GRAMMARÂ ARAPORE. We have 3 subdivisions: A Branch Office in Chandigarh. Divisional Office in Mumbai. Field Office in Pune. Field Sites in major cities and towns across nation. Operations at present are enabled via Hosting sites in following cities with internet connectivity: Aarahi, Bangalore. Andheri, Mumbai. Aldibagh, Pune. Chennai, Chennai. It was decided by the

management to redesign the entire website. As a result of which the priority of the development projects and the implementation has been done as follows: New Web site will be loaded with new features as part of upgrade to the present Web site. Web accessibility will be improved as per the ADA guidelines. Search engine optimisation will be improved. The layout will be made responsive to mobile devices and smartphones. Social media and usability features will be added for better user experience. New content will be added as per the product demand. Once done, the following features will be implemented in the web based system. Advanced search. Case studies. Competitive ranking. Query builder. User management. Advanced user registration. More than twenty new SME products will be featured. More than 50 pages have to be developed. Over 200 videos uploaded to the site, which had to be grouped in a way that the viewer can get a better understanding on the basic concepts, benefits and applications of the products. More than 100 pages need to be developed for the web portal. Existing web site has to

be redesigned and migrated to new platform.
Redesign: The new webpage is going to be developed in Drupal CMS Framework
The branding of the web site will be redesigned and revised based on our new marketing plan. Authentication: User management will be
