In my website, I need to have specific admin rights on a folder (the real one, the admin folder). There are maybe 50 other folders in this server and i don't want to set the rights of them all. Is there an easy way to select a specific folder and add just the authorisation to the parent folder? In other words: /someFolder/aFolderA/aFolderB/aFolderC/adminFolder is accessed with /someFolder/aFolderA/aFolderB/aFolderC/adminFolder/ A: Set the folder permissions, then set the write permissions on the parent folder (e.g. /someFolder) to 775 (or in the

case of a Unix system, 755) and set the write permissions on the directories inside the parent folder (e.g. /someFolder/aFolderA) to 775, and then chown the whole folder to your user and group. A:
