GameÄ Q; Firebase analytics documentation I am looking at the Firebase documentation and in the deep link analytics section, in the section for deep links, there are requirements for the Deep Link URL. I am struggling to find the documentation for this requirement, Can anyone help on where I can find the documentation for this? A: Take a look at the analytics.firebaseio.com/docs/deep-linking section. The deep link URL must either be: Only one of the following and any of them must not be the wildcard character '*': Without a schema: / / /*****. Use this to capture a random URL. For example, you could capture your last five bookmarks to firebase.com. With a schema: __id.ext, for example, __id.bookmark With a wildcard: /***/***/*. Use this to capture URLs that look similar. For example, your last 20 searches to firebase.com. The wildcard character * c6a93da74d
